AN UNDERWATER VR EXPERIENCE

MAR 6 — APRIL 28

Notice about Virtual Reality

Purchasing an optional ticket and participating in this 6-minute Virtual Reality experience may involve certain risks including, but not limited to nausea, dizziness, disorientation, visual abnormalities, injury or other discomfort. If you or a minor in your care participate, you are proceeding at your own risk.

Immediately discontinue use if you experience any of the following symptoms: seizures, loss of awareness, eye strain, eye or muscle twitching or involuntary movements.

For safety reasons and ability to follow instructions, no child under age 10 will be allowed to participate, and children under 18 must be accompanied by an adult.

Information from the headset manufacturer

- The Natural History Museum is utilizing an HTC Vive Virtual Reality headset.
- According to the manufacturers' website, "The product was not designed to be used by children. If older children are permitted to use the product, then adults should monitor them closely for any negative effects during and after their use of the product. Do not allow older children to use the product if negative effects are observed. Adults should also ensure that older children avoid prolonged use of the product."

For more information on product safety recommendations, including recommended ages and potential concerns related to accessibility, please visit the headset manufacturers' [website](#).
