

Wild L.A. Tour

Take a walk on the wild side.

BioSCAN *Level G, Nature Lab*

Our BioSCAN project is documenting the abundant biodiversity throughout L.A. county. Look closer at the insects that surround you and watch museum scientists sort and count insects.

Live Animals *Level G, Nature Lab (daily show at 3 pm)*

Meet and greet some of our Live Animal Program resident animals, from snakes to tortoises to bugs.

P-22 *Level G*

Learn the story of L.A.'s most famous feline. He crossed two freeways to make Griffith Park his home. At this exhibit you will hear a soundscape of his habitat and watch camera trap footage gathered by NHM scientists.

Museum Store (to buy the book!) *Level 1*

Stop by the Museum Store to take what you've learned home with you with a copy of *Wild L.A. Wild L.A.: Explore the Amazing Nature in and Around Los Angeles* is part natural history, field guide, and trip planner.

Bee Hotel *Nature Gardens*

Here at NHM we're doing our part to help these important pollinators thrive. Wooden bee boxes near the Pollinator Meadow provide habitat for California natives like the leaf-cutter bee.

Bird Viewing platform *Nature Gardens*

Enter a quiet oasis in the big city. The bird viewing platform provides a place to see many species of local birds.
