

FIND + COLOR: WHERE ARE THE ANIMALS?

In Griffith Park, P-22 is surrounded by a magical landscape of plants: blue elderberry, California buckwheat, miner's lettuce, chaparral whitethorn, black sage, castor bean, and coyote brush.

Five other animals also join him: a California ground squirrel, acorn woodpeckers, a California quail, and a koala from the L.A. Zoo named Killarney, who had an unfortunate run-in with P-22. Can you find and color in all of the animals? How about the five cabbage butterflies?
