

# Scale Scavenger Hunt

Search your house to see what you can find that is around the same size as a copepod!

Copepods are small marine creatures that can be found around the world, in both fresh water and seawater. These small creatures can grow up to 2 millimeters in length; which can be as tiny as your fingernail!

**These are what real copepods look like!**

# HOW TO PLAY

(Adult supervision recommended)

With a friend or family member, search your house together to see what you can find that is around the same size as your fingernail. You can compete by setting a timer, and at the tally up your scores to see who found the most items. This can be done with others in person, but is also a great game to play with friends over video call.

Here are some examples of what you may find on your scavenger hunt!
