

# Create an Ocean Costume

A lot of the citizens of Bikini Bottom move like us, but ocean animals have fins, flippers and tentacles they use to move through the water in special ways!

Think about what makes sea creatures unique and create your own costume using found objects.

## STEP 1

Draw an ocean creature. What is your favorite animal that lives in the ocean? Take a look at some pictures for inspiration!

## STEP 2

What do you have around your house that can be used to make your costume? Cardboard can make a great sea star mask or a shark fin! An old umbrella makes an excellent jellyfish! Get creative!

## STEP 3

After you finish your costume, try to answer these questions: What makes your creature different from one that would live on land? How does your creature move underwater? What does your creature eat? Does it move differently than the ones on SpongeBob?
