

Job, Research & Internship Opportunities In Marine Biology, Ecology & Conservation

Information regarding opportunities at other non-profit organizations is provided as a courtesy resource, not as an endorsement of any listed program.

The Student Conservation Association (The SCA)

<https://www.thesca.org/serve/positions>

The SCA offers paid internships for people over 14 years of age. These often provide housing, living stipend, and Americorps education awards. They partner with regional and national organizations to work on conservation projects. SCA's mission is to build the next generation of conservation leaders and inspire lifelong stewardship of the environment and communities by engaging young people in hands-on service to the land.

NatureBridge

[Careers | NatureBridge](#)

Today, NatureBridge connects over 35,000 students and 600 schools each year to the wonder and science of the natural world, igniting self-discovery and inspiring stewardship of our planet. We operate in Yosemite National Park and the Golden Gate National Recreation Area in California; Olympic National Park in Washington; and Prince William Forest Park in Virginia.

Resource Conservation District of the Santa Monica Mountains (RCDSMM)

[Get Involved - RCDSMM](#)

Our mission is to promote land stewardship and resource conservation through ecological research, conservation planning and design, habitat restoration and environmental education, while adhering to the highest standards of transparency and accountability as a public agency.

North American Association of Environmental Education (NAAEE)

[eePRO](#)

We bring the brightest minds together to advance environmental literacy and civic engagement through the power of education to create a more sustainable future for all.

Catalina Island Conservancy

[Internships - Catalina Island Conservancy](#)

The Vision of the Catalina Island Conservancy is to inspire a lifetime of exploration and stewardship of the natural and cultural world by encouraging experiences with the wild that deepen understanding of the connections between nature and self. We protect and restore the environment on Catalina, promoting and modeling ecologically sustainable communities to create a healthier future for this Island and our Earth.

Doris Duke Conservation Scholars Program[Doris Duke Conservation Scholars Program](#)

The Doris Duke Conservation Scholars Program at UCSC exposes early-career college students to the field of environmental conservation through field research, leadership and professional training. Each year, we select 20 students from around the U.S. and its territories to participate in our two-year conservation leadership program. Our students represent a diverse spectrum of cultures and backgrounds, which helps to cultivate an inclusive and rewarding experience.

Natural History Museum of Los Angeles County[Natural History Museum of Los Angeles County](#)

As NHMLAC initiatives continue to expand in fulfillment of our vision, we are constantly searching for new talent to join our two museums—the Natural History Museum and the La Brea Tar Pits. Opportunities at our museums vary from entry level to executive, from interfacing with our guests or educating students, to building our walls, or researching in the field, and include many positions that are an exciting mix of everything in between. As we begin to grow and expand our reach throughout the Los Angeles community, our museums have partnered with various schools to provide opportunities with internships, work study, and volunteer programs.
